Clicker questions

- We do not need to test inserting an element to the end of a list because it is treated the same as inserting into the middle.

Finishing `arrange-people`: sorting a List

```
1             arrange-people
2            / (fn. comp) \
3      layout-people     sort
4      / (reference)        \ (arbitrary sized data)
5  make-image               insert
6                             | (knowledge domain shift)
7                            older?
```
